

# COLD FRONT

# WARM FRONT

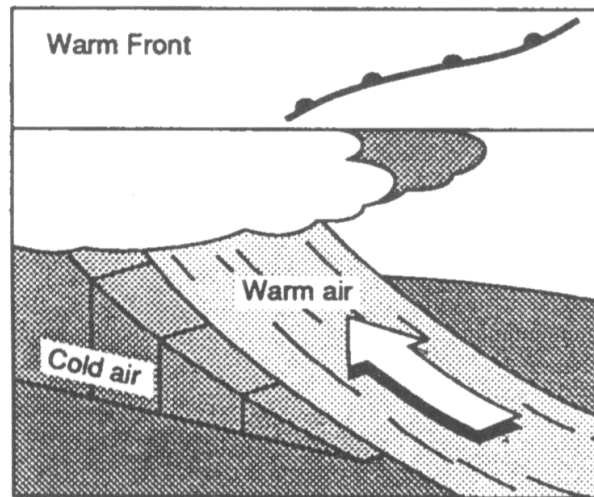

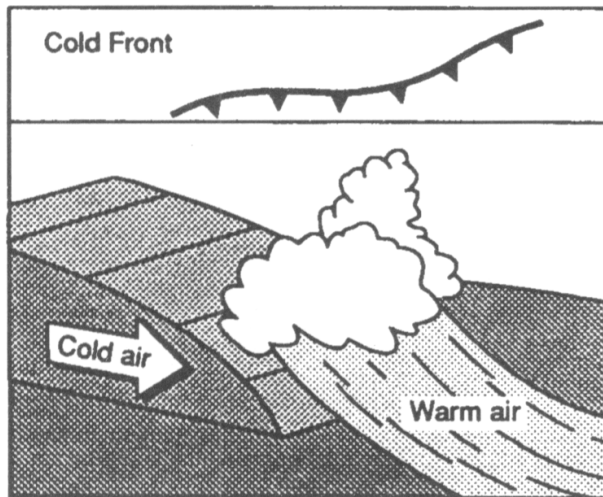

## Cold fronts

- Move fast
- Push warm air upward
- Large cumulus clouds
- High winds
- Violent storms
- Cold temperatures
- After, winds shift to W or NW and P rises

## Warm fronts

- Move slow
- Wedge over cool air
- Preceded by high, wispy clouds
- Lower, layered clouds near the front
- Light winds
- Steady, light rain
- Warm temperatures
- After, winds shift to S or SW

## LOW PRESSURE STORM SYSTEM
